

PML—Medication Categories Guide

Effective October 1, 2006

You can make the most of your pharmacy benefit plan and control your prescription medication costs by using this Preferred Medication List. Be sure to share this list with your doctor to select cost-effective medications that are clinically appropriate to treat your condition or maintain your health.

This Preferred Medication List (PML) was developed by Walgreens Health Initiatives, your plan sponsor's pharmacy benefit manager, under the direction of a committee of physicians and pharmacists. All medications on this list are preferred by your plan.

Understanding Your Tiered Copays

Your pharmacy benefit plan offers three categories—or tiers—of drugs that determine your costs (copays):

1st tier: Generics. Generics contain the same active ingredient as their brand name equivalents and offer the same effectiveness and safety. Generics generally have the lowest copay.

2nd tier: Preferred. Medications in this tier have been selected by your pharmacy benefit plan as preferred brand drugs. These drugs have higher copays than generics but are less costly than nonpreferred medications on the third tier.

3rd tier: Nonpreferred. Because they have a generic version or a second-tier alternative available, nonpreferred medications have the highest copays and are not listed on the PML.

How to Use This Guide

Whenever possible, have your doctor consult this guide for the lowest-cost brand name and generic medications available for your therapy. Some tips to keep in mind when using this guide:

- Therapeutic categories are listed alphabetically in all UPPERCASE letters in black boxes. Therapeutic classes in each category are printed in gray boxes.
- Types of medications in each class are printed in *italics*.
- Generic medications are listed in lowercase letters below the word “generic.”
- Preferred medications are listed in UPPERCASE letters below the word “BRAND.”
- If a medication is used to treat more than one condition, it will be listed under only one category. Check different categories for your medication.

All medications on the PML have been approved by the Food and Drug Administration (FDA).

Additional Information

Due to space limitations, not all medications are listed in this PML. Medication coverage and copays may vary from plan to plan. For more information specific to your plan, register on www.mywhi.com and click on “Check Drug Coverage/Copay” to verify coverage. You can also access the alphabetical version at the above web site.

Please note: The PML is subject to change without notice.
